

Get your website ready for carrier approval.

Carriers require clear, user-consented opt-in and transparent messaging before they approve a 10DLC campaign. Every place you collect a phone number must meet these standards. Use this checklist to prepare your site before you submit.

STOP - Verify your website before submitting

When you submit for 10DLC registration, our vendors provide your website URL to carriers. They will check it for compliant opt-in language. Your form must be live and publicly visible before you submit.

- Phone number fields must be optional.
